LAKE VERMONT MEADOWBROOK
EXTENSION PROJECT
ENVIRONMENTAL IMPACT STATEMENT
TABLE OF CONTENTS

Table of contents

ES	Executive summary.....1	2	Consultation Process2-1
ES.1	Project proponent3	2.1	Environmental objectives and performance outcomes.....2-1
ES.2	Project summary.....3	2.1.1	Consultation objectives 2-1
ES.3	Public consultation process4	2.1.2	Consultation strategy 2-2
ES.4	Project description.....4	2.2	Description of existing values2-2
ES.4.1	Construction.....4	2.2.1	Stakeholder identification 2-2
ES.4.2	Operations.....6	2.2.2	Stakeholder engagement and community consultation 2-8
ES.4.3	Rehabilitation7	2.3	Potential impacts.....2-10
ES.5	Environmental assessment8	2.4	Mitigation and management measures2-25
ES.5.1	Climate8	2.4.1	Ongoing consultation 2-25
ES.5.2	Land8	2.4.2	SIMP monitoring..... 2-25
ES.5.3	Water.....9	3	Project Description3-1
ES.5.4	Flooding.....12	3.1	Proposed development.....3-1
ES.5.5	Geomorphology.....14	3.1.1	Project title 3-1
ES.5.6	Flora and fauna.....14	3.1.2	Project objectives and rationale 3-1
ES.5.7	Biosecurity.....20	3.1.3	Project capital expenditure 3-2
ES.5.8	Air quality20	3.1.4	Nature and scale of the Project 3-3
ES.5.9	Noise and vibration22	3.1.5	Project timing 3-6
ES.5.10	Waste management23	3.1.6	Project location regional and local context .. 3-7
ES.5.11	Hazards and safety24	3.1.7	Workforce..... 3-15
ES.5.12	Cultural heritage.....25	3.2	Site description.....3-18
ES.5.13	Social environment.....25	3.2.1	Tenure..... 3-18
ES.5.14	Economic environment26	3.2.2	Existing infrastructure 3-24
ES.5.15	Transport27	3.2.3	Topography, landforms and catchments... 3-28
ES.6	General environmental management commitments28	3.2.4	Geology and economic resources..... 3-28
1	Introduction.....1-1	3.2.5	Soils and land use 3-35
1.1	Project proponent1-4	3.2.6	Protected areas 3-37
1.1.1	Environmental record..... 1-4	3.3	Construction3-40
1.1.2	Environmental, health, safety and community policies..... 1-4	3.3.1	Infrastructure corridor..... 3-41
1.2	Lake Vermont Mine1-7	3.3.2	Access/coal haulage roads..... 3-41
1.3	Project overview.....1-9	3.3.3	Mine infrastructure area (MIA) 3-44
1.4	Environmental impact assessment process1-10	3.3.4	Underground drifts and portal 3-46
1.4.1	Terms of reference 1-10	3.3.5	Ventilation systems 3-47
1.4.2	EIS preparation 1-10	3.3.6	Electricity supply infrastructure..... 3-47
1.4.3	Public submissions..... 1-11	3.3.7	Water supply and management infrastructure 3-47
1.5	Project approvals.....1-13	3.3.8	Construction materials and equipment..... 3-49
1.5.1	Commonwealth legislation..... 1-16	3.3.9	Construction disturbance area 3-50
1.5.2	Queensland legislation: environmental values 1-17	3.4	Operations.....3-50
1.5.3	Queensland legislation: cultural heritage .. 1-26	3.4.1	Mine resource, schedule and sequence 3-50
1.5.4	Queensland legislation: development and planning..... 1-28	3.4.2	ROM coal handling and processing 3-73
1.5.5	Queensland legislation: natural resources. 1-31	3.4.3	Product coal handling and transport 3-76
1.5.6	Queensland legislation: human health and wellbeing 1-33	3.4.4	Reject management..... 3-76
1.5.7	Queensland legislation: land and government 1-35	3.4.5	Ongoing resource definition and exploration activities..... 3-77
1.5.8	Legislative requirements summary 1-36	3.4.6	Hazardous substances 3-77
		3.4.7	Operations disturbance areas 3-78
		3.5	Infrastructure3-79
		3.5.1	Transport 3-79

3.5.2 Energy..... 3-80

3.5.3 Telecommunications 3-80

3.5.4 Sewage treatment 3-80

3.5.5 Water supply and management 3-81

3.6 Project alternatives3-84

3.6.1 Mining method alternatives 3-84

3.6.2 Longwall mining layout and alternatives.... 3-85

3.6.3 Open-cut mining layout and sequence 3-86

3.6.4 Infrastructure corridor alignment 3-87

3.6.5 Infrastructure and MIA..... 3-87

3.6.6 Workforce accommodation 3-88

3.6.7 Not proceeding with the Project 3-89

3.7 Ecologically sustainable development3-89

3.7.1 Precautionary principle 3-90

3.7.2 Intergenerational equity 3-92

3.7.3 Conservation of biological diversity and ecological integrity 3-92

3.7.4 Valuation 3-93

4 Climate4-1

4.1 Existing climate.....4-1

4.1.1 Rainfall..... 4-4

4.1.2 Temperature 4-4

4.1.3 Humidity..... 4-5

4.1.4 Wind speed and direction 4-5

4.1.5 Atmospheric stability 4-6

4.2 Project vulnerability to natural and induced hazards4-6

4.2.1 Bushfire 4-6

4.2.2 Cyclone 4-7

4.2.3 Extreme rainfall 4-7

4.2.4 Flood..... 4-7

4.2.5 Extreme temperatures 4-8

4.3 Climate change projection4-8

4.4 Mitigation and management measures4-9

5 Land and visual amenity5-1

5.1 Environmental objectives and performance outcomes.....5-1

5.2 Local planning context5-2

5.3 Description of existing values5-3

5.3.1 Local topography and landforms..... 5-3

5.3.2 Geology 5-5

5.3.3 Land systems 5-5

5.3.4 Soil characteristics..... 5-6

5.3.5 Current local land use..... 5-9

5.3.6 Areas of state interest..... 5-10

5.3.7 Areas of regional interest..... 5-15

5.3.8 Reserve land..... 5-16

5.3.9 Native title..... 5-18

5.3.10 Existing resource tenure..... 5-18

5.3.11 Quarry resources..... 5-18

5.3.12 Contaminated land..... 5-18

5.3.13 Visual amenity 5-21

5.4 Potential impacts.....5-25

5.4.1 Subsidence 5-25

5.4.2 Landform and topography..... 5-29

5.4.3 Land use and land use suitability..... 5-30

5.4.4 Contaminated land 5-31

5.4.5 Existing resource tenements 5-32

5.4.6 Native Title..... 5-32

5.4.7 Cumulative impacts 5-32

5.4.8 Visual amenity 5-34

5.5 Monitoring and management5-38

5.5.1 Subsidence..... 5-38

5.5.2 Land disturbance 5-39

5.5.3 Erosion and stability 5-39

5.5.4 Topsoil management 5-40

5.5.5 Land use suitability 5-40

5.5.6 Land contamination 5-41

5.5.7 Visual amenity and lighting 5-41

6 Rehabilitation6-1

6.1 Relevant policy and legislation6-1

6.1.1 Progressive rehabilitation..... 6-1

6.1.2 Financial provisioning 6-2

6.2 Key influencing ecosystem processes and functions.....6-2

6.2.1 Topography, hydrology and climate 6-2

6.2.2 Waste rock and coal reject geochemistry 6-2

6.2.3 Topsoil resources..... 6-3

6.2.4 Current land use and land suitability..... 6-4

6.3 Rehabilitation planning6-5

6.3.1 Rehabilitation objectives 6-5

6.3.2 Post-mining land use 6-5

6.3.3 Rehabilitation areas..... 6-11

6.3.4 Rehabilitation milestones and completion criteria 6-11

6.3.5 PRCP schedule and progressive rehabilitation 6-14

6.4 General rehabilitation methods.....6-14

6.4.1 Topsoil management and surface preparation 6-14

6.4.2 Revegetation..... 6-19

6.5 Specific rehabilitation areas.....6-19

6.5.1 Waste rock emplacements 6-19

6.5.2 Water management infrastructure 6-21

6.5.3 Underground mining 6-21

6.5.4 Mine infrastructure 6-26

6.5.5 Coal reject disposal..... 6-27

6.6 Monitoring and maintenance6-30

6.6.1 Monitoring..... 6-30

6.6.2 Maintenance..... 6-30

6.7 Closure and relinquishment.....6-31

7 Groundwater7-1

7.1 Environmental objectives and performance outcomes.....7-1

7.2 Description of existing values7-2

7.2.1 Environmental values and water quality objectives..... 7-2

7.2.2 Geology..... 7-3

7.2.3 Baseline groundwater characteristics 7-5

7.2.4 Hydraulic properties 7-10

7.2.5 Groundwater quality 7-10

7.2.6 Water dependent assets 7-13

7.3 Potential impacts 7-17

7.3.1 Model methodology 7-17

7.3.2 Predicted groundwater impacts 7-21

7.3.3 Impacts to groundwater-dependent ecosystems (GDEs) 7-36

7.3.4 Great Artesian Basin impacts 7-38

7.3.5 Groundwater quality 7-38

7.3.6 Cumulative impacts 7-38

7.4 Mitigation and management measures 7-39

7.4.1 Impacted groundwater bore management 7-39

7.4.2 Groundwater monitoring program 7-39

7.4.3 Groundwater trigger levels and limits 7-39

7.4.4 Groundwater management plan 7-44

7.4.5 Future groundwater modelling 7-44

7.4.6 Adaptive management 7-44

7.4.7 Stygofauna impact mitigation and management 7-44

7.4.8 Groundwater-dependent ecosystem impact mitigation and management 7-44

8 Surface Water 8-1

8.1 Environmental objectives and performance outcomes 8-1

8.2 Description of existing values 8-2

8.2.1 Environmental values 8-2

8.2.2 Regional hydrology 8-3

8.2.3 Local hydrology 8-4

8.2.4 Existing uses 8-4

8.2.5 Baseline surface water characteristics 8-8

8.2.6 Baseline water quality data 8-9

8.2.7 Controlled releases 8-12

8.2.8 Water quality objectives 8-12

8.2.9 Sediment quality objectives 8-15

8.2.10 Site water balance numerical model 8-15

8.3 Potential impacts 8-16

8.3.1 Surface water quality 8-16

8.3.2 Sediment dams 8-18

8.3.3 Mine water dams 8-19

8.3.4 Open pit 8-19

8.3.5 Rehabilitated pit landform 8-19

8.3.6 Site water balance conceptual model 8-19

8.3.7 Geomorphology 8-21

8.3.8 Reductions in streamflow 8-24

8.3.9 Flooding impacts 8-28

8.3.10 Site water demand 8-28

8.3.11 Regional water availability 8-28

8.3.12 Wetlands 8-29

8.3.13 Cumulative impacts 8-29

8.4 Mitigation and management measures 8-29

8.4.1 Water management system 8-29

8.4.2 Sediment and erosion control 8-34

8.4.3 Water Management Plan 8-38

8.4.4 Water quality management and monitoring 8-38

8.4.5 Receiving environment monitoring program 8-38

8.4.6 Corrective actions 8-39

8.4.7 Annual review 8-40

9 Flooding and Regulated Structures 9-1

9.1 Environmental objectives and performance outcomes 9-1

9.2 Description of existing values 9-1

9.2.1 Nearby water resources 9-1

9.2.2 Land uses and regional context 9-3

9.2.3 Proximity to infrastructure 9-3

9.2.4 Flood modelling 9-3

9.2.5 History of flooding 9-6

9.2.6 Current flood risk 9-7

9.2.7 Geomorphology 9-8

9.3 Proposed infrastructure 9-10

9.3.1 Flood protection levees 9-10

9.3.2 Diversion drains 9-14

9.3.3 Underground mine dewatering infrastructure 9-14

9.3.4 Sediment dams 9-15

9.3.5 Other infrastructure 9-16

9.4 Potential impacts 9-16

9.4.1 Flood depth and afflux impacts 9-16

9.4.2 Flood velocity impacts 9-19

9.4.3 Geomorphology impacts 9-23

9.4.4 Subsidence impacts 9-24

9.4.5 Water management infrastructure risk 9-28

9.4.6 Haul road and watercourse crossings 9-33

9.4.7 Waste rock emplacements 9-33

9.4.8 Cumulative impacts 9-34

9.4.9 Sensitivity assessments 9-34

9.5 Mitigation and management measures 9-35

9.5.1 Flood protection levees 9-35

9.5.2 Ponding mitigation drains and bunds 9-36

9.5.3 Sediment dams 9-36

9.5.4 Haul road drainage 9-36

9.5.5 Receiving environment monitoring 9-36

9.5.6 Subsidence monitoring 9-37

9.5.7 Adaptation strategies 9-37

10 Terrestrial Ecology 10-1

10.1 Environmental objectives and performance outcomes 10-1

10.1.1 Flora and fauna 10-1

10.2 Regional and local setting 10-2

10.3 Study area and methodology 10-5

10.3.1 Study area 10-5

10.3.2 Desktop assessment 10-5

10.3.3 Field survey 10-6

10.3.4 Groundwater dependant ecosystems methodology 10-12

10.4 Terrestrial ecological values 10-14

10.4.1	Regional Ecosystems	10-14	11.4.6	Aquatic fauna.....	11-17
10.4.2	Threatened Ecological Communities.....	10-18	11.4.7	Macroinvertebrates.....	11-17
10.4.3	Flora species of conservation significance	10-18	11.4.8	Stygofauna.....	11-17
10.4.4	Fauna species of conservation significance	10-18	11.4.9	Matters of national environmental significance	11-19
	10-18	11.4.10	Matters of state environmental significance	11-19
10.4.5	Environmentally Sensitive Areas	10-21			
10.4.6	Pest species	10-21	11.5	Potential impacts and avoidance, mitigation and management measures.....	11-20
10.4.7	Groundwater Dependant ecosystems.....	10-22	11.5.1	Direct impacts.....	11-20
10.5	Potential impacts to terrestrial ecology values	10-26	11.5.2	Indirect impacts.....	11-22
	10-26	11.5.3	Cumulative impacts	11-33
10.5.1	Direct impacts	10-26	11.5.4	Facilitated impacts.....	11-33
10.5.2	Indirect impacts.....	10-31	11.6	Impact assessments.....	11-34
10.5.3	Facilitated impacts	10-43	11.6.1	Matters of National Environmental Significance (MNES).....	11-34
10.5.4	Cumulative impacts	10-43	12	Biosecurity.....	12-1
10.6	Potential impacts to MNES	10-45	12.1	Environmental objectives	12-1
10.6.1	Brigalow (Acacia harpophylla dominant and co-dominant) TEC.....	10-46	12.2	Existing biosecurity risk	12-1
10.6.2	Poplar Box Grassy Woodland on Alluvial Plains TEC.....	10-54	12.2.1	Introduced fauna species	12-1
10.6.3	Ornamental Snake.....	10-60	12.2.2	Introduced flora species	12-1
10.6.4	White-throated Needletail	10-72	12.2.3	Introduced aquatic flora and fauna	12-4
10.6.5	Squatter Pigeon.....	10-75	12.2.4	Public health and agricultural pest species	12-4
10.6.6	Australian Painted Snipe	10-84			
10.6.7	Koala.....	10-91	12.3	Potential impacts.....	12-5
10.6.8	Greater Glider.....	10-102	12.3.1	Introduced fauna species	12-5
10.6.9	Migratory Birds.....	10-112	12.3.2	Introduced flora species	12-5
10.7	Potential impacts to MSES	10-117	12.3.3	Introduced aquatic flora and fauna	12-6
10.7.1	Regulated vegetation	10-120	12.3.4	Public health and agricultural pest species	12-6
10.7.2	Connectivity areas.....	10-123	12.4	Mitigation and management measures	12-6
10.7.3	Wetlands and watercourses.....	10-123	12.4.1	Introduced fauna management measures .	12-6
10.7.4	Protected wildlife habitat.....	10-123	12.4.2	Introduced flora management measures ...	12-7
10.7.5	Short-beaked Echidna	10-124	12.4.3	Public health designated pest management	12-7
10.8	Mitigation and management measures	10-125			
10.8.1	Habitat and vegetation disturbance.....	10-126	12.4.4	Pest and Weed Management Plan	12-8
10.8.2	Subsidence	10-128	12.4.5	Existing Lake Vermont Pest and Weed Management Plan	12-8
10.8.3	Site operations	10-129	12.4.6	Monitoring program	12-9
10.9	Proposed offsets.....	10-131	13	Air Quality	13-1
10.9.1	Offset management strategy	10-132	13.1	Environmental objectives and performance outcomes.....	13-1
11	Aquatic Ecology	11-1	13.1.1	Air quality assessment terminology	13-1
11.1	Environmental objectives and performance outcomes.....	11-1	13.1.2	Air quality criteria	13-2
11.2	Regional and local setting	11-3	13.2	Existing air environment.....	13-3
11.3	Study area and methodology.....	11-6	13.2.1	Local topography and climate	13-4
11.3.1	Study area	11-6	13.2.2	Atmospheric conditions.....	13-5
11.3.2	Desktop assessment.....	11-6	13.2.3	Sensitive receptors	13-9
11.3.3	Field survey	11-6	13.2.4	Regional air quality	13-10
11.3.4	Survey methodology	11-10	13.3	Potential impacts.....	13-13
11.3.5	Stygofauna.....	11-11	13.3.1	Air quality modelling methodology	13-13
11.3.6	Groundwater-dependent ecosystems.....	11-12	13.3.2	Air quality emissions results	13-17
11.4	Aquatic ecological values.....	11-15	13.3.3	GHG assessment methodology.....	13-30
11.4.1	Watercourses	11-15	13.3.4	GHG emissions results	13-31
11.4.2	Wetlands	11-15			
11.4.3	Groundwater-dependent ecosystems.....	11-16			
11.4.4	Aquatic habitat.....	11-16			
11.4.5	Aquatic flora	11-16			

13.4 Regulatory obligations—NGER and the Safeguard Mechanism13-44

13.5 Mitigation and management measures ..13-44

13.5.1 Additional air quality controls 13-45

13.5.2 GHG mitigation and management 13-45

13.5.3 Monitoring and reporting..... 13-46

14 Noise and Vibration14-1

14.1 Environmental objective and outcomes....14-1

14.1.1 Noise assessment terminology..... 14-1

14.1.2 Acoustic quality objectives..... 14-2

14.2 Proposed noise criteria for the Project14-4

14.3 Description of existing values14-5

14.3.1 Operational noise..... 14-5

14.4 Potential impacts.....14-9

14.4.1 Upset conditions 14-9

14.4.2 Operational noise..... 14-10

14.4.3 Blasting..... 14-12

14.4.4 Cumulative noise..... 14-17

14.4.5 Impact assessment summary 14-19

14.5 Mitigation and management measures ..14-19

14.5.1 Monitoring..... 14-19

14.5.2 Response to a noise exceedance..... 14-20

15 Waste Management15-1

15.1 Environmental objective and outcomes....15-1

15.2 Waste generation15-1

15.2.1 Non-mineral waste 15-1

15.2.2 Mineral waste..... 15-2

15.2.3 Mine-affected wastewater..... 15-5

15.3 Existing waste generation15-5

15.4 Regional waste management facilities.....15-5

15.5 Potential impacts.....15-6

15.6 Waste management15-7

15.6.1 Waste management principles..... 15-7

15.6.2 Waste management hierarchy..... 15-8

15.6.3 Waste generation and management..... 15-10

15.6.4 Decommissioning and rehabilitation 15-18

15.6.5 Natural resource use efficiency: Water... 15-18

15.6.6 Natural resource use efficiency: Energy... 15-19

15.7 Non-mineral waste management15-19

15.7.1 General waste management 15-20

15.7.2 Regulated waste management..... 15-20

15.7.3 Sewage management..... 15-21

15.7.4 Non-mineral waste management plan..... 15-22

15.8 Mineral waste management15-23

15.8.1 Waste rock management 15-23

15.8.2 Coal reject management 15-24

15.8.3 Rejects management plan..... 15-24

15.9 Performance monitoring and review15-24

15.10 Mitigation and management measures ..15-25

16 Hazards and safety16-1

16.1 Introduction.....16-1

16.2 Scope.....16-1

16.3 Objectives and performance outcomes16-1

16.4 Risk assessment methodology16-2

16.4.1 Risk assessment scheme..... 16-3

16.4.2 Sensitive receptors 16-7

16.5 Anthropogenic risks16-7

16.5.1 Site worker health and safety..... 16-7

16.5.2 Hazardous and dangerous substances 16-9

16.6 Project risk from natural hazards16-12

16.6.1 Geophysical risk..... 16-12

16.6.2 Cyclone and severe wind hazard risk..... 16-13

16.6.3 Flood risk 16-13

16.6.4 Heat and heatwave risk..... 16-13

16.6.5 Bushfire risk 16-13

16.6.6 Climate change risk..... 16-13

16.6.7 Dangerous wildlife and disease vectors ... 16-14

16.7 Project siting and layout16-14

16.8 Risk analysis, evaluation and controls.....16-15

16.9 Mitigation and management measures ..16-15

16.9.1 Safety and health management system (SHMS) 16-16

16.9.2 Emergency response plan (ERP) 16-19

16.9.3 Bushfire management plan (BMP) 16-22

16.9.4 Monitoring and improvement 16-23

17 Cultural Heritage17-1

17.1 Environmental objective and outcomes....17-1

17.2 Description of existing values17-1

17.2.1 Indigenous cultural heritage..... 17-1

17.2.2 Non-Indigenous cultural heritage..... 17-3

17.3 Potential impacts.....17-6

17.3.1 Indigenous cultural heritage..... 17-6

17.3.2 Non-Indigenous cultural heritage..... 17-6

17.4 Mitigation and management measures17-7

17.4.1 Indigenous cultural heritage..... 17-7

17.4.2 Non-Indigenous cultural heritage..... 17-7

18 Social18-1

18.1 Environmental objectives18-1

18.2 Description of existing values18-1

18.2.1 SIA study areas 18-2

18.2.2 Existing social environment 18-4

18.3 Potential impacts.....18-9

18.3.1 Cumulative social impacts 18-10

18.4 Mitigation and management measures ..18-20

18.4.1 Community and stakeholder engagement measures 18-20

18.4.2 Workforce management measures 18-21

18.4.3 Housing and accommodation measures .. 18-21

18.4.4 Local business and industry procurement measures 18-30

18.4.5 Health and community wellbeing measures 18-35

18.4.6 SIMP monitoring..... 18-42

19 Economics.....19-1

19.1 Environmental objectives and outcomes ..19-1

19.2 Description of existing values19-2

19.3 Potential impacts.....19-2

19.3.1 Potential beneficial economic impacts of the Project 19-2

19.3.2 Potential adverse economic impacts of the Project 19-4

19.3.3 Potential cumulative impacts 19-5

19.4 Cost-benefit analysis.....19-8

19.5 Mitigation and management measures19-8

20 Transport.....20-1

20.1 Environmental objectives and outcomes ..20-1

20.2 Project transport tasks.....20-1

20.3 Road transport.....20-2

20.3.1 Description of existing infrastructure and values 20-2

20.3.2 Potential impacts..... 20-6

20.3.3 Mitigation and management measures ... 20-11

20.4 Rail transport.....20-12

20.4.1 Description of existing infrastructure and values 20-12

20.4.2 Potential impacts..... 20-12

20.4.3 Mitigation measures 20-12

20.5 Sea transport20-12

20.5.1 Description of existing infrastructure and values 20-12

20.5.2 Potential impacts..... 20-12

20.5.3 Mitigation measures 20-12

20.6 Air transport20-14

20.6.1 Description of existing infrastructure and values 20-14

20.6.2 Potential impacts..... 20-14

20.6.3 Mitigation measures 20-14

21 Matters of National Environmental Significance.....21-1

21.1 Introduction.....21-1

21.1.1 Title of the action 21-1

21.1.2 Proponent 21-1

21.1.3 Objective of the action 21-2

21.1.4 Location of the action..... 21-5

21.1.5 Background to the development of the action 21-19

21.1.6 Environmental impact assessment process 21-22

21.2 Description of the action21-26

21.2.1 Project overview..... 21-26

21.2.2 Project timing 21-27

21.2.3 Construction..... 21-28

21.2.4 Operations..... 21-37

21.2.5 ROM coal handling and processing 21-62

21.2.6 Product coal handling and transport..... 21-63

21.2.7 Reject management 21-64

21.2.8 Ongoing resource definition and exploration activities 21-65

21.2.9 Hazardous substances..... 21-65

21.2.10 Operations disturbance areas 21-66

21.3 Infrastructure21-67

21.3.1 Transport 21-67

21.4 Energy.....21-69

21.4.1 Electricity Supply 21-69

21.4.2 Fuel Supply 21-69

21.5 Telecommunications.....21-69

21.6 Sewage treatment21-69

21.7 Water supply and management.....21-70

21.7.1 Water supply 21-70

21.7.2 Water management 21-70

21.8 Feasible alternatives and consequence of not proceeding.....21-72

21.8.1 Mining method 21-73

21.8.2 Longwall mining layout and alternatives .. 21-74

21.8.3 Open-cut mining layout and sequence..... 21-75

21.8.4 Infrastructure corridor alignment..... 21-75

21.8.5 Infrastructure and MIA 21-76

21.8.6 Workforce Accommodation 21-77

21.8.7 Not proceeding with the Project 21-78

21.9 Surface water21-78

21.9.1 Context and conceptualisation..... 21-78

21.9.2 Baseline surface water characteristics 21-83

21.9.3 Controlled releases..... 21-86

21.9.4 Surface water quality objectives 21-87

21.9.5 Sediment quality objectives 21-89

21.9.6 Potential impacts..... 21-89

21.9.7 Avoidance, mitigation, management measures and monitoring 21-101

21.9.8 IESC checklist 21-112

21.9.9 Significant impact assessment..... 21-112

21.10 Flooding.....21-115

21.10.1 Flood characteristics and context 21-115

21.10.2 Flood modelling 21-115

21.10.3 History of flooding 21-118

21.10.4 Current flood risk..... 21-120

21.10.5 Geomorphology..... 21-120

21.10.6 Proposed structures 21-122

21.10.7 Potential impacts..... 21-128

21.10.8 Mitigation, management measures and monitoring 21-145

21.11 Groundwater21-147

21.11.1 Context and conceptualisation 21-147

21.11.2 Baseline groundwater characteristics 21-150

21.11.3 Water dependent assets 21-158

21.11.4 Potential impacts..... 21-162

21.11.5 Mitigation, management measures and monitoring 21-181

21.11.6 IESC checklist 21-186

21.11.7 Significant impact assessment..... 21-187

21.12 Terrestrial ecology21-189

21.12.1 Methodology 21-189

21.12.2 Terrestrial ecology values 21-247

21.12.3 Potential impacts to terrestrial ecology values 21-252

21.12.4	Assessment of impact to listed threatened species and communities	21-272	21.18	Consideration of the action against the objectives of the EPBC Act	21-425
21.13	Aquatic ecology	21-373	21.18.1	The objects of the EPBC Act.....	21-426
21.13.1	Existing environment.....	21-373	21.19	Environmental offsets.....	21-427
21.13.2	Aquatic ecological values	21-378	21.19.1	Regulatory framework.....	21-427
21.13.3	Potential impacts.....	21-380	21.19.2	Significant impacts.....	21-428
21.13.4	Significant impact assessment, mitigation, management and monitoring	21-394	21.19.3	Offset requirements	21-429
21.14	Stygofauna.....	21-406	22	Proposed Environmental Management and Monitoring Commitments	22-1
21.14.1	Background ecology	21-406	23	Proposed Environmental Authority Conditions	23-1
